SERVICING NOTICES ON CHECKING

1. KEEP THE NOTICES

As for the places which need special attentions, they are indicated with the labels or seals on the cabinet, chassis and parts. Make sure to keep the indications and notices in the operation manual.

2. AVOID AN ELECTRIC SHOCK

There is a high voltage part inside. Avoid an electric shock while the electric current is flowing.

3. USE THE DESIGNATED PARTS

The parts in this equipment have the specific characters of incombustibility and withstand voltage for safety. Therefore, the part which is replaced should be used the part which has the same character.

Especially as to the important parts for safety which is indicated in the circuit diagram or the table of parts as a  mark, the designated parts must be used.

4. BE CAREFUL WITH THE LCD PANEL

Avoid a shock to the panel while servicing. Take enough care to deal with it.

5. PUT PARTS AND WIRES IN THE ORIGINAL POSITION AFTER ASSEMBLING OR WIRING

There are parts which use the insulation material such as a tube or tape for safety, or which are assembled in the condition that these do not contact with the printed board. The inside wiring is designed not to get closer to the pyrogenic parts and high voltage parts. Therefore, put these parts in the original positions.

6. PERFORM A SAFETY CHECK AFTER SERVICING

Confirm that the screws, parts and wiring which were removed in order to service are put in the original positions, or whether there are the portions which are deteriorated around the serviced places serviced or not. Check the insulation between the antenna terminal or external metal and the AC cord plug blades. And be sure the safety of that.

(INSULATION CHECK PROCEDURE)

1. Unplug the plug from the AC outlet.
2. Remove the antenna terminal on TV and turn on the TV.
3. Insulation resistance between the cord plug terminals and the eternal exposure metal [Note 2] should be more than 1M ohm by using the 500V insulation resistance meter [Note 1].
4. If the insulation resistance is less than 1M ohm, the inspection repair should be required.

[Note 1]

If you have not the 500V insulation resistance meter, use a Tester.

[Note 2]

External exposure metal: Antenna terminal
Headphone jack

HOW TO ORDER PARTS

Please include the following informations when you order parts. (Particularly the CHASSIS CODE.)

1. MODEL NUMBER and CHASSIS CODE
YOU can find it in the back of your unit.
2. PART NO. and DESCRIPTION
You can find it in your SERVICE MANUAL.

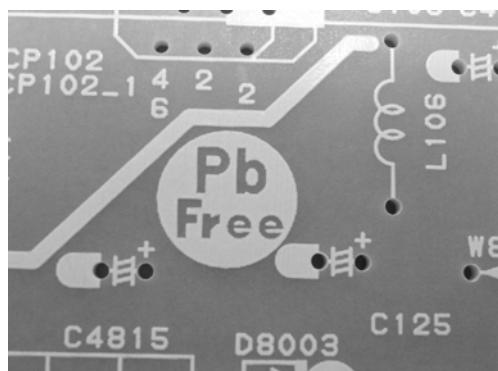

IMPORTANT

When you exchange IC and Transistor with a heat sink, apply silicon grease (YG6260M) on the contact section of the heat sink. Before applying new silicon grease, remove all the old silicon grease. (Old grease may cause damage to the IC and Transistor).

ABOUT LEAD FREE SOLDER (PbF)

Distinction of PbF PCB:

PCB's (manufactured) using lead free solder will have a PbF printing on the PCB.
(Please refer to figures.)

Caution:

- Pb free solder has a higher melting point than standard solder;
Typically the melting point is 86°F~104°F(30°C~40°C) higher.
Please use a soldering iron with temperature control and adjust it to 650°F ± 20°F (350°C ±10°C).
In case of using high temperature soldering iron, please be careful not to heat too long.
- Pb free solder will tend to splash when heated too high (about 1100°F/ 600°C).
- All products with the printed circuit board with PbF printing must be serviced with lead free solder.
When soldering or unsoldering, completely remove all of the solder from the pins or solder area,
and be sure to heat the soldering points with the lead free solder until it melts sufficiently.

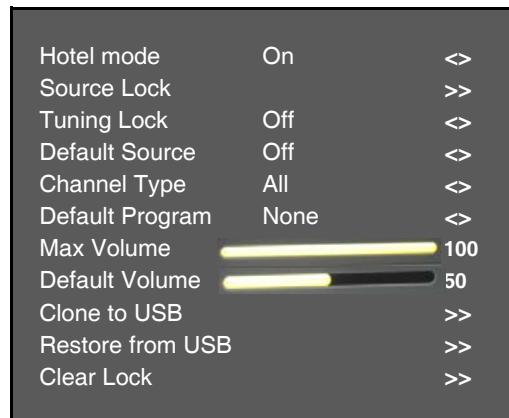

Recommendations

Recommended lead free solder composition is Sn-3.0Ag-0.5Cu.

HOTEL MODE FUNCTION

To set the Hotel mode, please follow the steps below.

1. Press the SETUP/MENU ---> 1147 button on the remote control.
2. Press the DOWN button on the remote control,
3. Select the "Setup" menu , then press ENTER button.
4. Select the "Hotel Mode" menu, Select "On".
5. The Hotel mode setting menu will appear.
6. Using the UP/DOWN button on the remote control, select the desired mode. Then press the ENTER button.
7. Using the LEFT/RIGHT button on the remote control, set the mode to desired setting.
8. The Hotel mode has now been set up.

To reset the Hotel mode, please follow the steps below.

1. Press the SETUP/MENU ---> 1147 button on the remote control.
2. Press the DOWN button on the remote control,
3. Select the "Setup" menu , then press ENTER button.
4. Select the "Hotel Mode" menu, Select "On".
5. The Hotel mode setting menu will appear.
6. Press the DOWN button on the remote control,
7. Select the "Clear Lock" menu, then press ENTER button.
8. The setting items has now been returned to initial value.

Setting item	Setting value	Initial value	FUNCTION
Source Lock	ANTENNA/CABLE/ SATELLITE/AV COMPONENT/ HDMI/DVD/USB	—	Setting Input skip, combine with "Default Source".
Tunning Lock	OFF/ON	OFF	Setting of the tunning Lock. When turn on "Tuning lock", User cannot choose the following item in MENU. (skip an item and not available.) Tuner Mode, Channels, Satellite Setup, First time installation, Reset Default, Clean All
Default Source	OFF/ANTENNA/CABLE/ SATELLITE/AV COMPONENT/ HDMI/DVD/USB	OFF	Setting Input Source, combine with "Source Lock" If select "Source Lock" for this function disappear.
Channel Type	ALL/DIGITAL/RADIO/ ANALOGUE	ALL	Setting of the CH if select "Default Source" to ALL/ ANTENNA/CABLE/SATELLITE input.
Default Program	NONE/1/2/3/.../197	NONE	Setting of the CH if select "Default Source" to ANTENNA/ CABLE/SATELLITE input.
Max volume	0~100	100	Setting of the maximum volume value.
Default Volume	0~100	50	Setting volume at Power on.
Clone to USB	—	—	Copy to USB about User Menu setting, Hotel Mode setting and stored channels.
Restore from USB	—	—	Read and Restore data from USB that is saved by Cone to USB.
Clear Lock	—	—	Setting of the Hotel Mode return factory setting.

DISASSEMBLY INSTRUCTIONS

1. REMOVAL OF MECHANICAL PARTS AND P.C. BOARDS

CAUTION

Be careful not to remove the LVDS cable forcibly, because the LVDS cable may be damaged.

1-1: STAND ASS'Y (Refer to Fig. 1-1)

1. Remove the 4 screws (1).
2. Remove the Stand Ass'y in the direction of arrow.

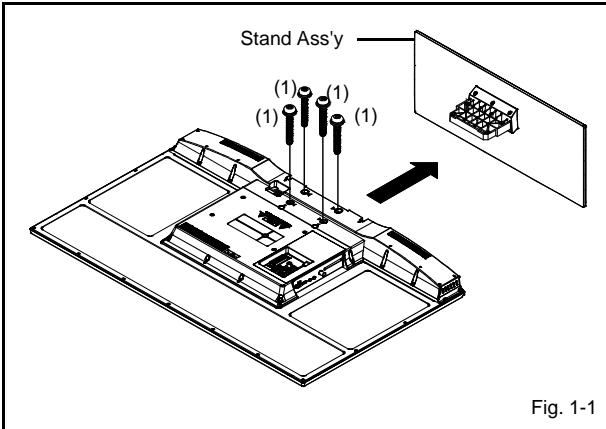

Fig. 1-1

1-2: COVER BACK ASS'Y (Refer to Fig. 1-2)

1. Remove the 11 screws (1).
2. Remove the Cover Back Ass'y in the direction of arrow.

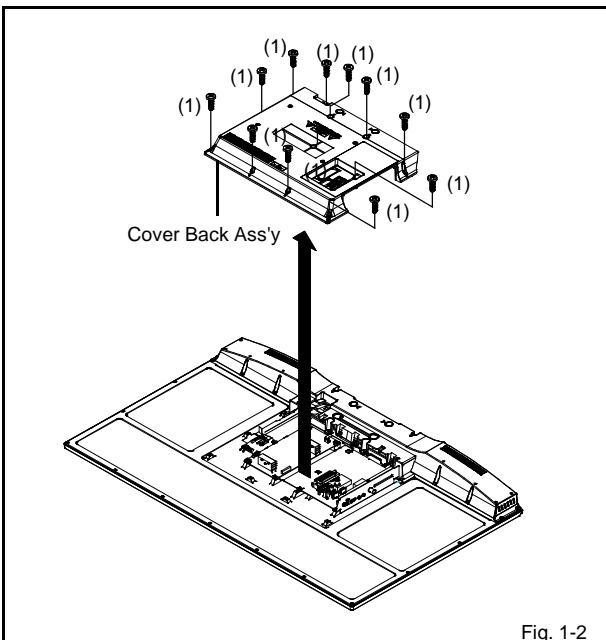

Fig. 1-2

1-3: SPEAKER BOX ASSY, REMOCON PCB and OPERATION PCB (Refer to Fig. 1-3)

1. Remove the 8 screws (1).
2. Disconnect the following connectors: **(CD301, CD2201 and CD2202).**
3. Remove the Speaker Box Ass'y in the direction of arrow (A).
4. Unlock the 2 supports (2).
5. Remove the Remocon PCB in the direction of arrow (B).
6. Unlock the support (3).
7. Remove the Operation PCB in the direction of arrow (C).

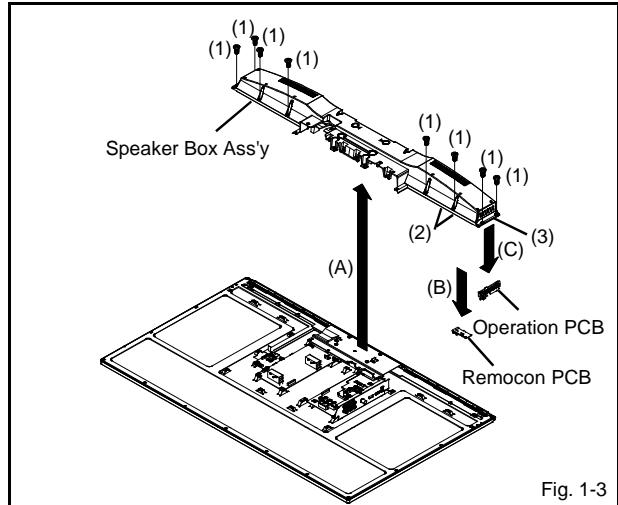

Fig. 1-3

1-4: MAIN PCB (Refer to Fig. 1-4)

1. Remove the 4 screws (1).
2. Remove the 4 screws (2).
3. Disconnect the following connectors: **(CD502 and CD2801).**
4. Remove the Plate Jack in the direction of arrow (A).
5. Remove the Main PCB in the direction of arrow (B).

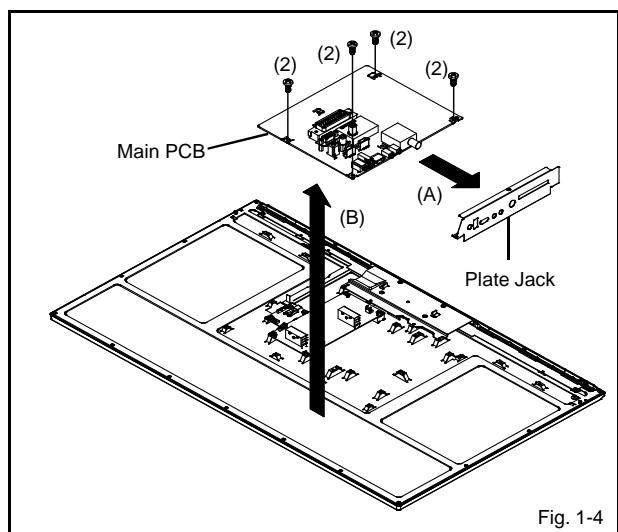

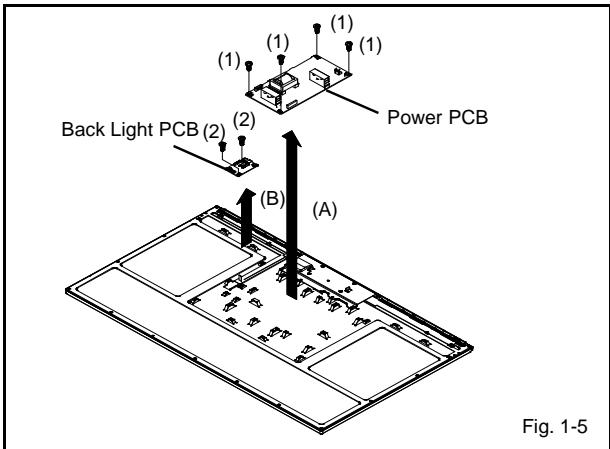

Fig. 1-4

DISASSEMBLY INSTRUCTIONS

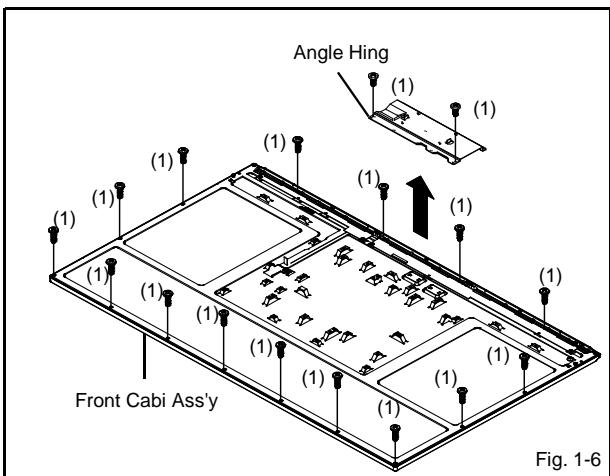

1-5: POWER PCB and BACL LIGHT PCB (Refer to Fig. 1-5)

1. Remove the 4 screws (1)
2. Disconnect the following connectors:
(CD503, CP7002 and CP7003).
3. Remove the POWER PCB in the direction of arrow (A).
4. Remove the 2 screws (2)
5. Remove the Back Light PCB in the direction of arrow (B).

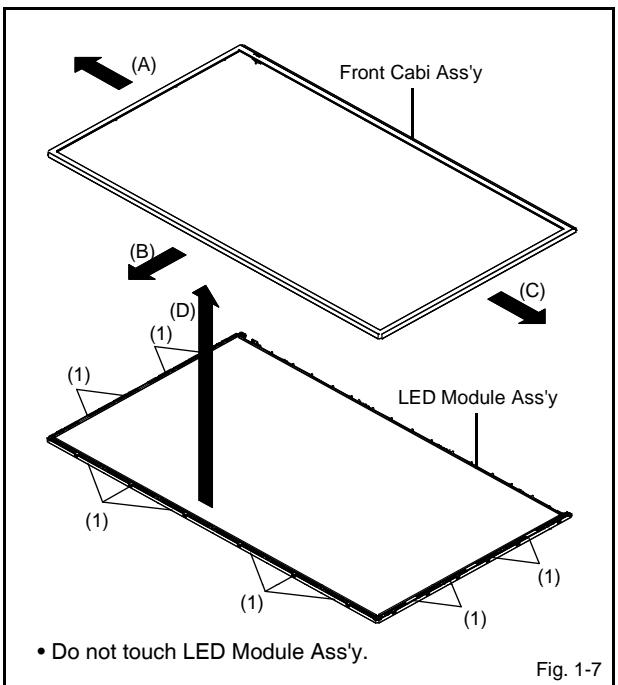

1-6: ANGLE HING (Refer to Fig. 1-6)

1. Remove the 17 screws (1).
2. Remove the Angle Hing in the direction of arrow.

1-7: LED MODULE ASS'Y (Refer to Fig. 1-7)

1. Unlock the 14 supports (1).
2. Remove the LED Module Ass'y in the direction of arrow (A) -> (B) -> (C) -> (D), Please remove carefully and slowly.

DISASSEMBLY INSTRUCTIONS

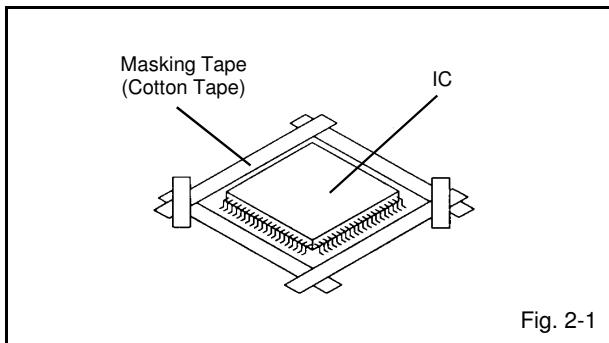

2. REMOVAL AND INSTALLATION OF FLAT PACKAGE IC

REMOVAL

1. Put Masking Tape (cotton tape) around the Flat Package IC to protect other parts from any damage. (Refer to Fig. 2-1.)

NOTE

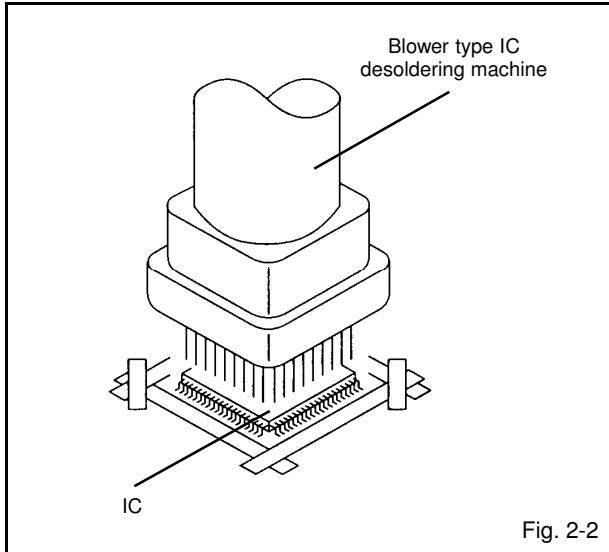

Masking is carried out on all the parts located within 10 mm distance from IC leads.

2. Heat the IC leads using a blower type IC desoldering machine. (Refer to Fig. 2-2.)

NOTE

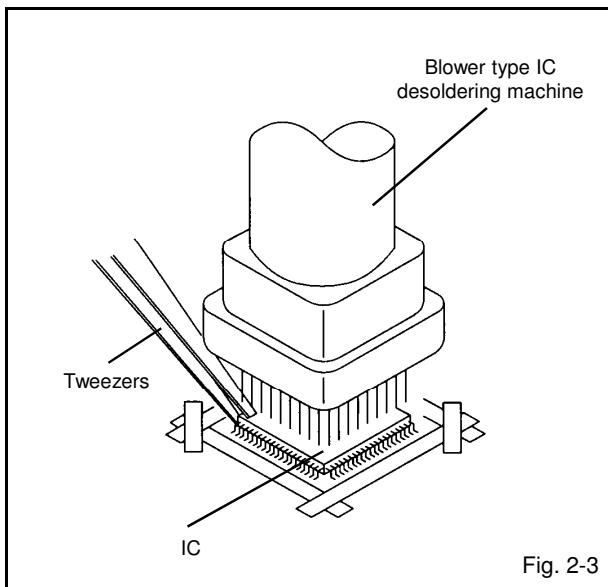

Do not rotate or move the IC back and forth , until IC can move back and forth easily after desoldering the leads completely.

3. When IC starts moving back and forth easily after desoldering completely, pickup the corner of the IC using tweezers and remove the IC by moving with the IC desoldering machine. (Refer to Fig. 2-3.)

NOTE

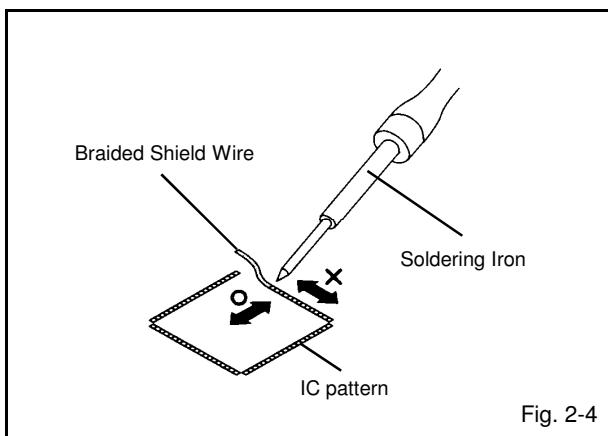

Some ICs on the PCB are affixed with glue, so be careful not to break or damage the foil of each IC leads or solder lands under the IC when removing it.

4. Peel off the Masking Tape.
5. Absorb the solder left on the pattern using the Braided Shield Wire. (Refer to Fig. 2-4.)

NOTE

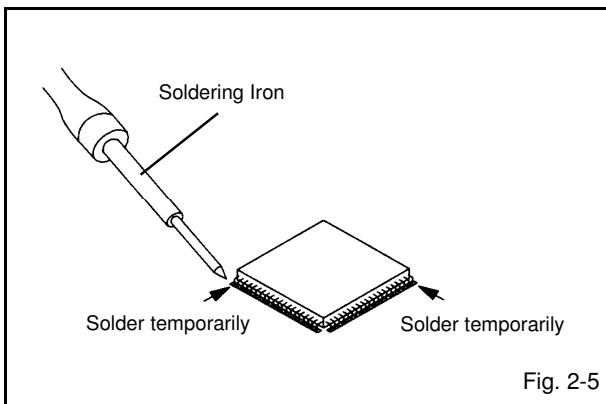

Do not move the Braided Shield Wire in the vertical direction towards the IC pattern.

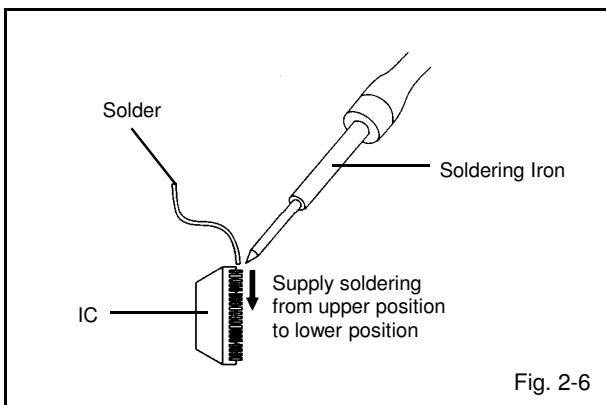

DISASSEMBLY INSTRUCTIONS

INSTALLATION

1. Take care of the polarity of new IC and then install the new IC fitting on the printed circuit pattern. Then solder each lead on the diagonal positions of IC temporarily. (Refer to Fig. 2-5.)

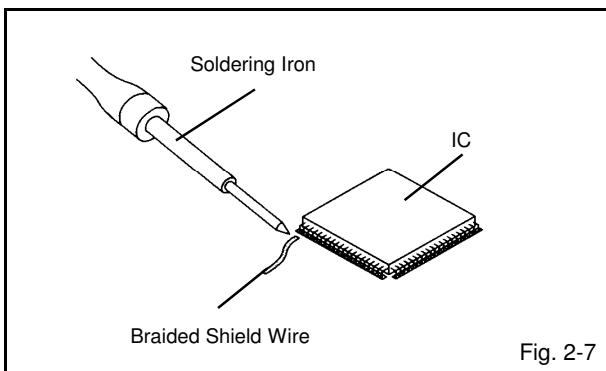

2. Supply the solder from the upper position of IC leads sliding to the lower position of the IC leads. (Refer to Fig. 2-6.)

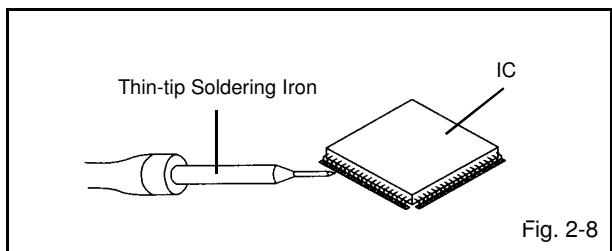

3. Absorb the solder left on the lead using the Braided Shield Wire. (Refer to Fig. 2-7.)

NOTE

Do not absorb the solder to excess.

4. When bridge-soldering between terminals and/or the soldering amount are not enough, resolder using a Thintip Soldering Iron. (Refer to Fig. 2-8.)

5. Finally, confirm the soldering status on four sides of the IC using a magnifying glass. Confirm that no abnormality is found on the soldering position and installation position of the parts around the IC. If some abnormality is found, correct by resoldering.

NOTE

When the IC leads are bent during soldering and/or repairing, do not repair the bending of leads. If the bending of leads are repaired, the pattern may be damaged. So, always be sure to replace the IC in this case.

SERVICE MODE LIST

This unit is provided with the following SERVICE MODES so you can repair, examine and adjust easily.

CAUTION

Do not feel after other MENU.

1. Check of the VERSION and SUM DATA on the screen.

1-1 : Press the SETUP/MENU ---> 1147 button on the remote control.

1-2 : Press the DOWN button on the remote control,

1-3 : Select the "Setup" menu , then press ENTER button.

1-4 : Select the "Version Info" menu, then press ENTER button.

1-5 : On the screen as shown in **Fig. 1-1**.

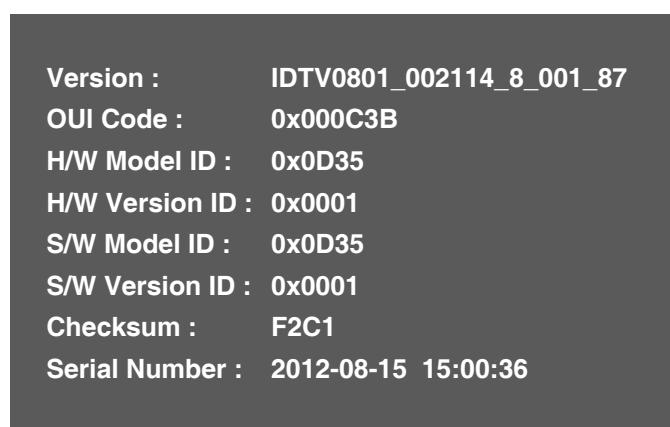

Fig. 1-1

ELECTRICAL ADJUSTMENTS

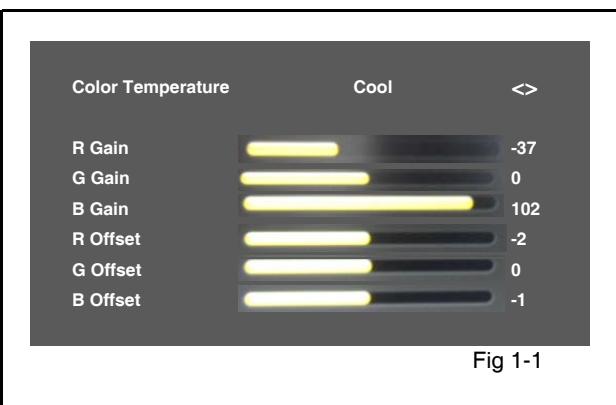

1. ADJUSTMENT PROCEDURE

Prepare the following measurement tools for electrical adjustments.

1. Pattern Generator

On-Screen Display Adjustment

1. Press the SETUP/MENU ---> 1147 button on the remote control.
2. Press the DOWN button on the remote control.
3. Select the "Video" menu, then press ENTER button on the remote control.
4. Select the "Color Temperature" menu , then press ENTER button on the remote control.
5. On the screen as shown in **Fig. 1-1.**

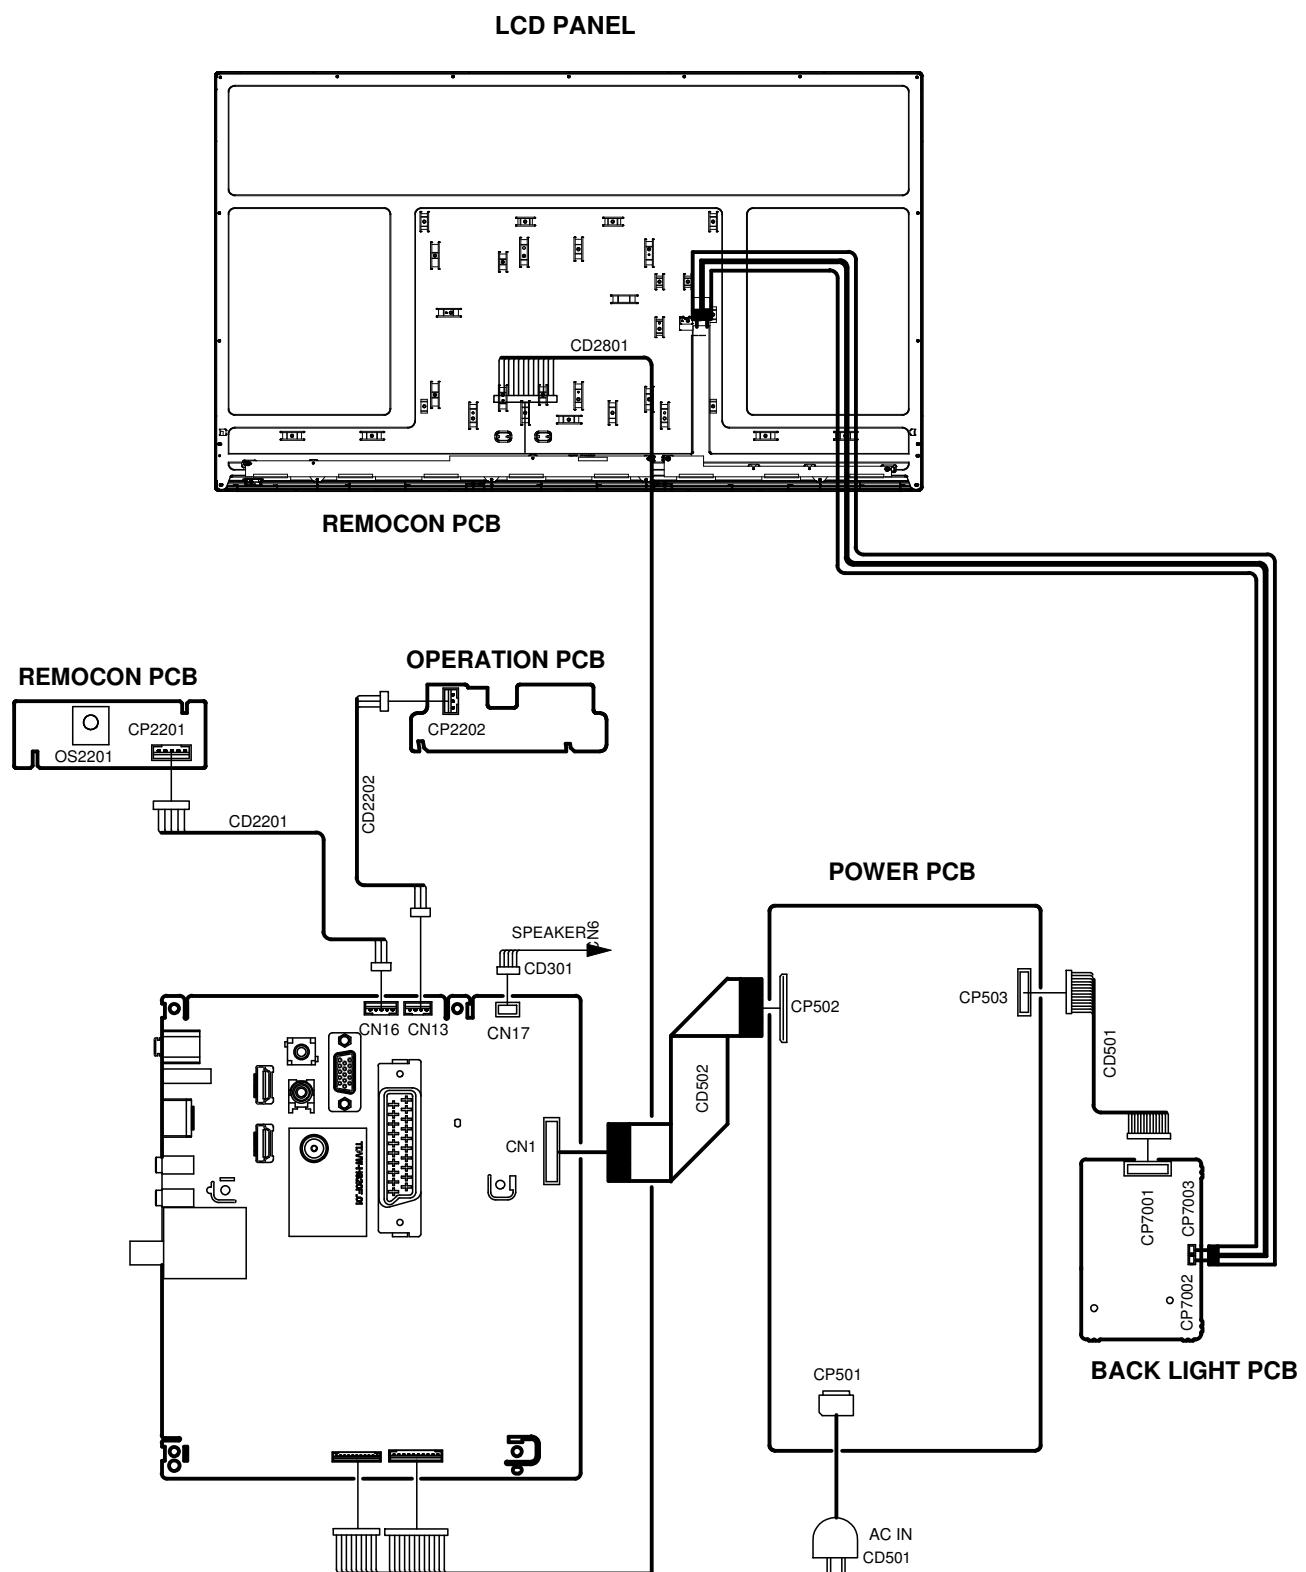

2. BASIC ADJUSTMENTS

2-1: WHITE BALANCE

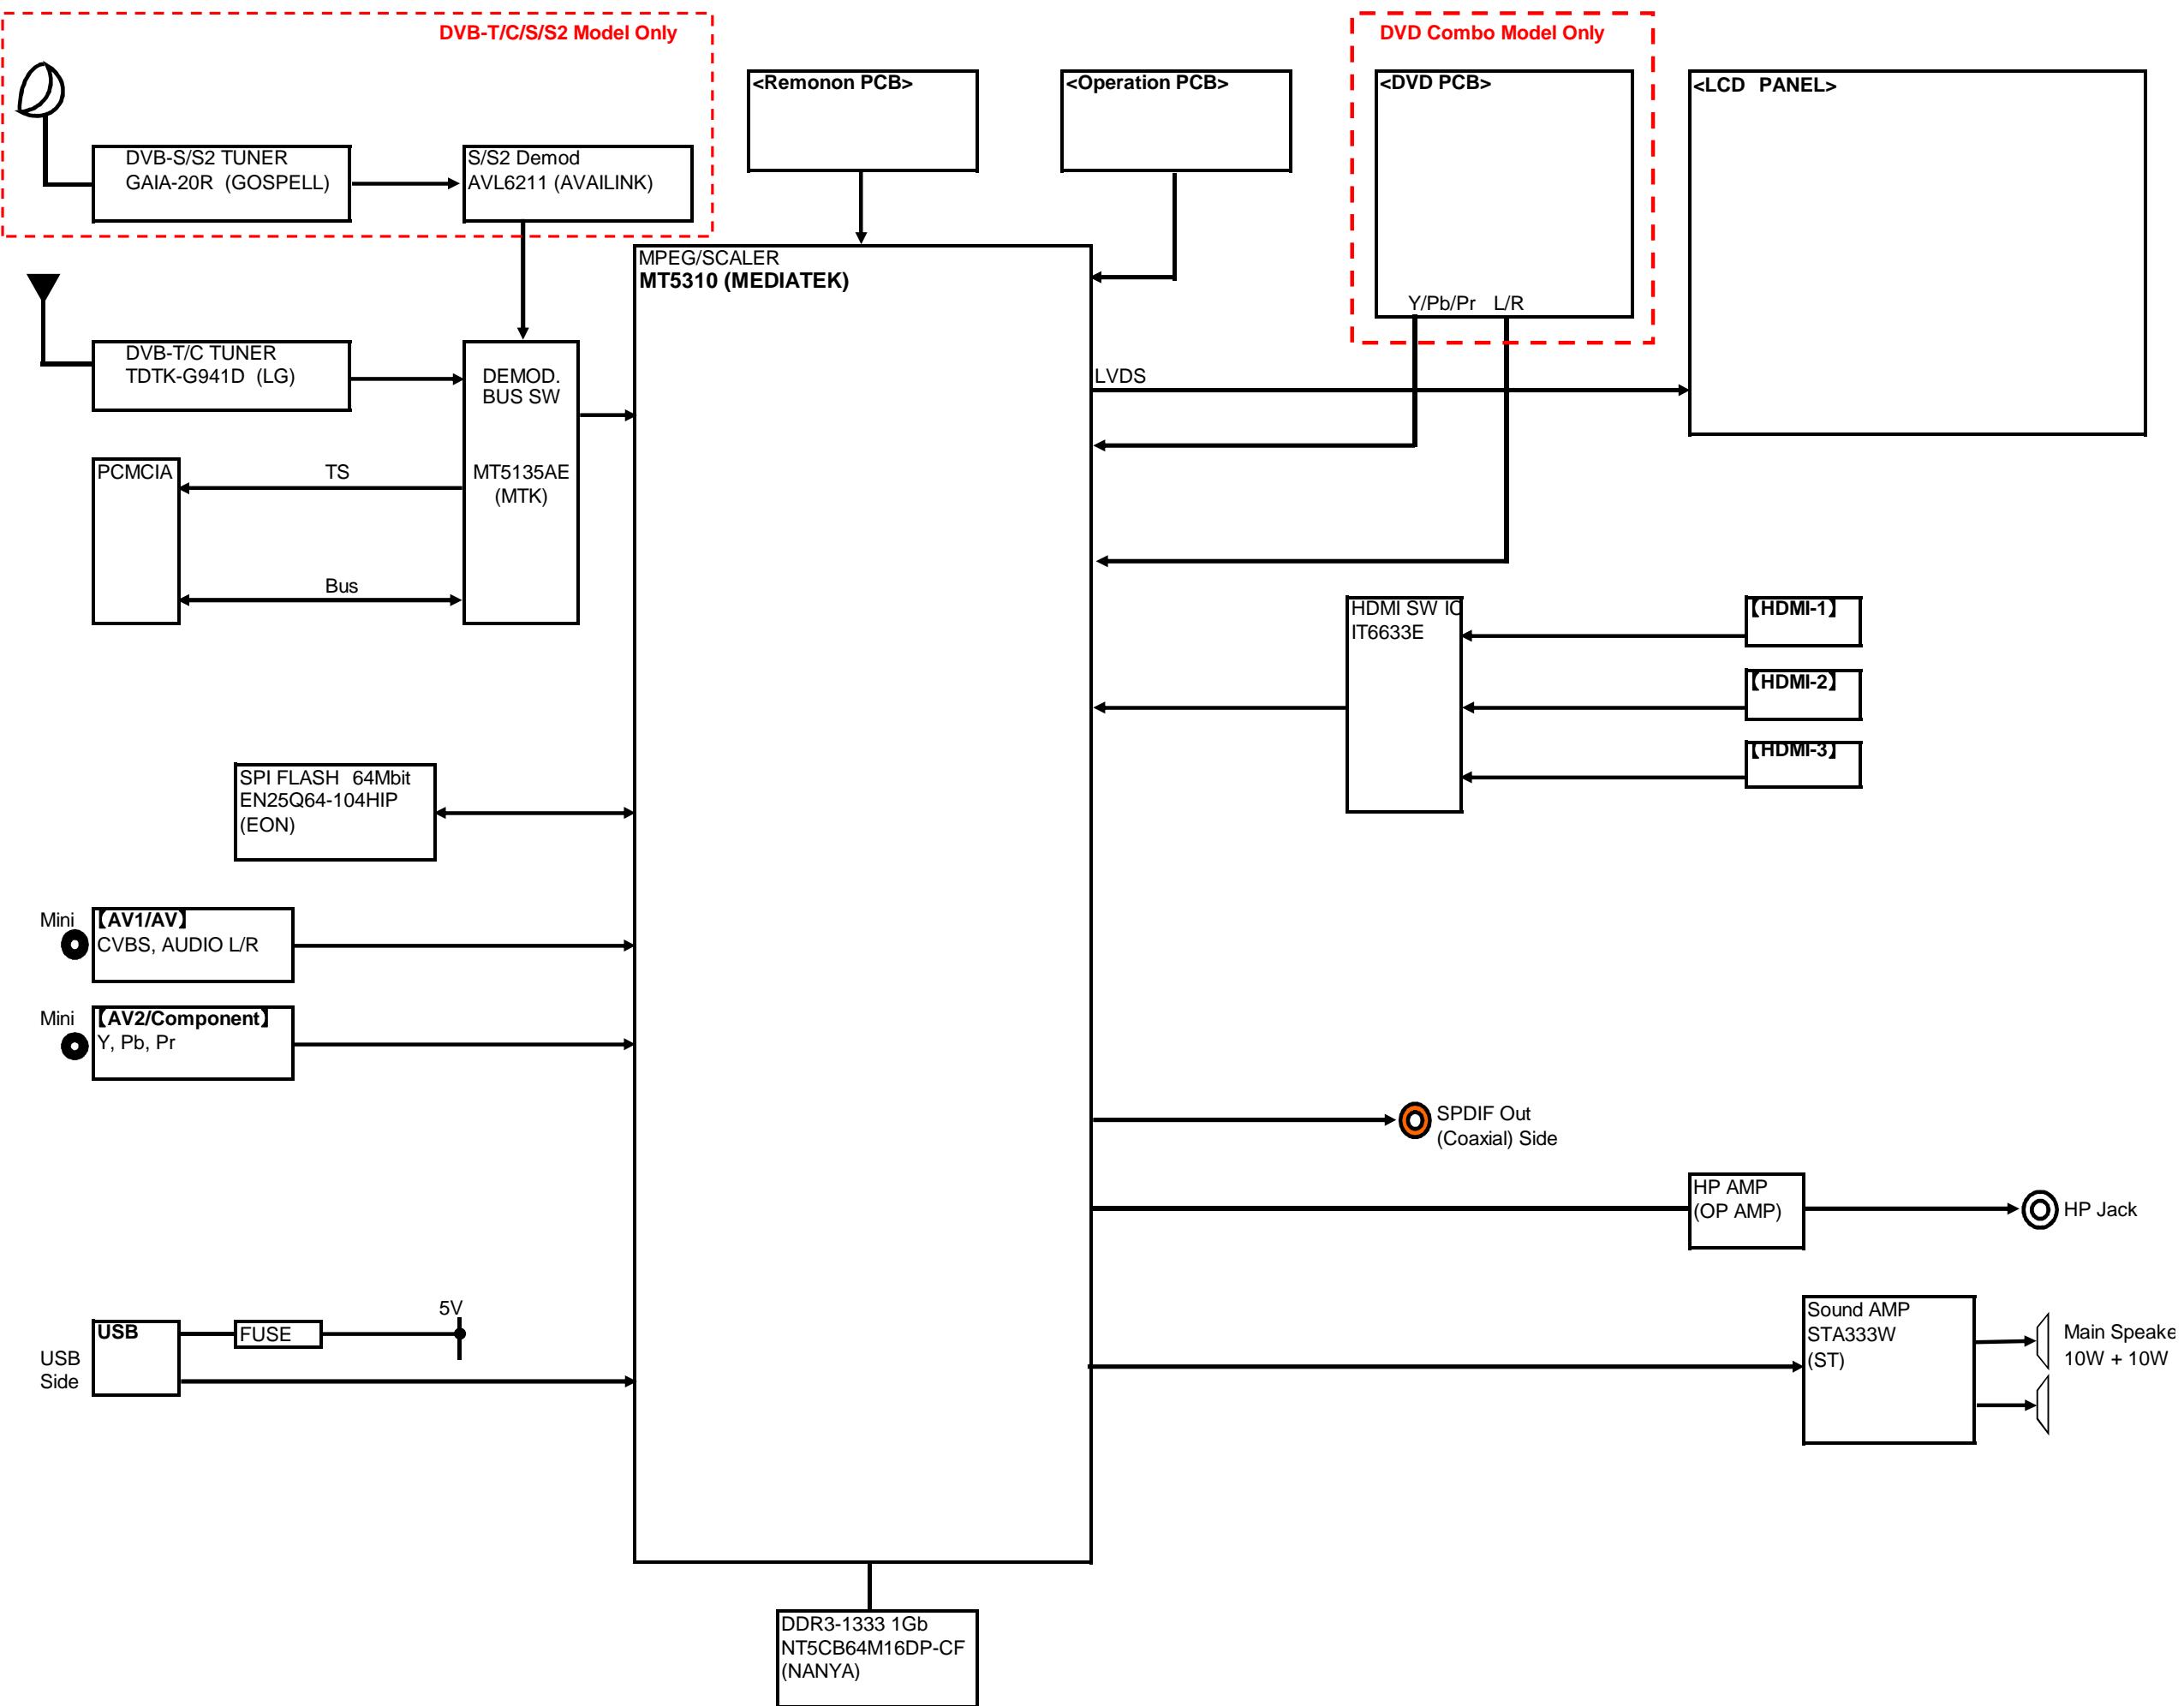

1. Place the set in Aging Test for more than 15 minutes.
2. Please select input About mode to adjust W/B.
3. Receive the gray scale pattern from the Pattern Generator.
4. Press the INPUT SELECT button on the remote control to set to the AV mode.
5. Using the remote control, set the brightness and contrast to normal position.
6. Press the MENU---> 1147 button on the remote control.
7. Press the DOWN button on the remote control.
8. Select the "Video" menu, then press ENTER button on the remote control.
9. Select the "Color Temperature" menu , then press ENTER button on the remote control.
10. Press the UP/DOWN button on the remote control to select the "R Gain", "G Gain", "B Gain", "R Offset", "G Offset", "B Offset".
11. Adjust the LEFT/RIGHT button on the remote control to whiten the R Gain, G Gain, B Gain, R Offset, G Offset, B Offset at each step tone sections equally..
12. Perform the above adjustments 10 and 11 until the white color is achieved.

ELECTRICAL ADJUSTMENTS
